

## Application for Spanish Safety Program

Hispanic employees are significantly more likely to get injured on the job. These injuries not only impact morale, but they are costly to the employer. Increased workers' compensation, damaged equipment, additional training, replacement employees, shut down costs, etc. significantly add to the cost of workplace accidents. No one wants to get injured on the job. In an effort to reduce these injuries, and help employees work safely, ABC is offering employers the opportunity to participate in a Spanish Safety Program. The employer will receive training, assistance, and materials at little or no cost through grant money established to help reduce workplace injuries. This is available to a select group of companies who will be individually picked after completing the application below. Please return the application by faxing it to the below number.

Company Name: \_\_\_\_\_ Contact: \_\_\_\_\_

Office Phone #: \_\_\_\_\_ Mobile Phone #: \_\_\_\_\_

E-mail: \_\_\_\_\_ Title/Position: \_\_\_\_\_

Company address: \_\_\_\_\_
